## Compact Extreme Duty Lighting Highest Shock Handling Capabilities

The XD-9 is sized for integration into smaller areas.

- 9 LEDs
- Extreme Vibration Durability And Shock Handling
- Compact Housing For Small Areas
- Housing is Type III Gray Anodized Aluminum for Corrosion Protection (Mil-A-8625)
- Corrosion Resistant Stainless Steel Mounting Bracket and Hardware
- IP69K Waterproof Rated (High Pressure, High Temperature Spray, and Dust Ingress)
- Withstands 50G HALT Testing
- Gold Plated Circuit Board and Connector Contacts for Electrical Properties and Corrosion Resistance
- Advanced Thermal Management
- Reverse Polarity (Inverted Wiring) Protection
- Dimensions: 3.9" X 3.9" X 2.65" (99 mm X 99 mm X 67.3mm)

**Two-bolt XD-Lock™ mounting system isolates lamp housing from mounting bracket for high frequency vibration dampening.**

# XD-16

## Extreme Duty Lighting Highest Shock Handling Capabilities

Designed for extremely rugged environments requiring high shock handling, the XD-16 provides the most light output of any similarly sized lamp with the highest vibration handling capability.

Over two years of testing went into making the XD-16 the ultimate work light featuring lens isolation, and the revolutionary XD-Lock™ system.

- 16 LEDs
- Large Amount of Area Light - Projects 300+ Meters
- Extreme Vibration Durability And Shock Handling
- Housing is Type II Black Anodized Aluminum for Corrosion Protection (Mil-A-8625)
- Corrosion Resistant Stainless Steel Mounting Bracket and Hardware

# HD-32

## High Power Flood Light with 32 LEDs Heavy Duty Shock Handling Capabilities

Ideal for large tracked equipment requiring smooth, high-contrast lighting in a large area, the HD-32 withstands high vibration while providing perimeter and angle lighting.

For applications with little or no air flow, it features dual-zone thermal management to monitor and cool the left and right sides independently.

When replacing quartz halogen lamps, there is a drastic reduction in energy consumption. In many cases, the HD-32 can replace a 1000W filament lamp and reduce power consumption by more than 80% while offering 50% more light.

- 32 LEDs
- Illuminates Large Perimeter
- Angled Lighting
- High Vibration Durability And Shock Handling
- Housing is Type II Black Anodized Aluminum for Corrosion Protection (Mil-A-8625)
- Corrosion Resistant Stainless Steel Mounting Bracket and Hardware
- IP69K Waterproof Rated (High Pressure, High Temperature Spray, and Dust Ingress)
- Gold Plated Circuit Board and Connector Contacts for Electrical Properties and Corrosion Resistance
- Two Independent Electrical Circuits
- Advanced Dual Zone Thermal Management Maintains Optimum Temperature If Cooling Is Obstructed
- Reverse Polarity (Inverted Wiring) Protection
- Dimensions: 8" X 4.9" X 2.7"

# HD-80

## Heavy Duty Flood Light with 80 LEDs

Our most powerful LED flood light, the HD-80 is designed to withstand the harshest environments.

Recommended for perimeter and angle illumination, the double trunnion bracket offers 90 degrees of tilt (70° down and 20° up). The chassis sits forward of the base for 70 degrees of downward tilt without beam cutoff from the bracket.

The 415 watt model outperforms the typical 1,000 watt metal halide or sodium lamps while consuming less than half the power, greatly decreasing the cost of energy to operate the machine.

Recommended for shovels, draglines, and marine applications.

- 80 LEDs

# IDX

## Alpha-Numeric Identification Displays

Equipment identification impacts safety, requiring clear communication of characters. IDX characters are 18" (457.2 mm) in height for high visibility.

For a high level of reliability, the display panel has a hardened borosilicate lens option, dual o-ring seals, a billet aluminum chassis, and gold plated mil-spec contacts.

Additional character segments were added to center the number "1." This prevents visual blending with adjacent characters.

Displays are easy to change with the high-power magnet included with unit. All programming is stored in a non-volatile memory chip.

- 2 Preset Brightness Levels
- Selectable Dimming
- Solid Characters
- Centered Number '1'
- Dual O-Rings
- Gold Plated Circuit Board and Connector Contacts for Electrical Properties and Corrosion Resistance

# ML-24

## High Visibility Indicator Lamp For Off Road

The ML-24 was designed for applications requiring high indicator light levels. While most marker lamps are intended for use on highways, the ML-24 penetrates thick layers of dust or mud buildup, fog, snow, and rain.

The ML-24 indicator lamp features the same robust protection and reliable circuits as our XD line of work lamps. It is fully encapsulated and features a hardened borosilicate lens for waterproofing.

The ultimate upgrade to off-highway equipment.

# Fluorescent Stringable Shelter Lights

## STRING LIGHT

### Durable Design Protects Lamp

- Patented floating sockets
- Shatterproof, protective tube shield
- Twin lamp design

### Electronic Ballast Efficiency

- More efficient and lighter weight than magnetic ballast lights
- Flicker free, no excessive heat build up

### One Man Set Up

- Compact for easy transport and set up

- **Low Amp Draw**
- **Low Heat Signature**
- **Flicker Free**
- **Multi-Volt**

### Will Not Compromise Peripheral Electronics

- EMI (electromagnetic interference) protected lights.
- Will not compromise peripheral electronics, communication equipment, computers or medical equipment.
- Black out filter greatly reduces visible signature.
- Will not trip the most sensitive GFCI when connecting over 30 lights, exceeding military specifications of 12-light connectivity.
- Lights operate independently with on/off switches, allowing any combination of lights to operate.

Field Hospitals, Command Centers, Force Provider, BEAR Base

**Compliant with MIL-PRF-44259**

### High Intensity Universal Lighting

- Suitable for applications that do not involve EMI sensitivity or peripheral electronic equipment.
- Twin-lamp design for high intensity lighting.
- Lights operate independently with on/off switches, allowing any combination of lights to operate.
- Available with optional 110V - 230V capability.
- Meets U.S. and Canadian standards for water resistant portable lighting.

Maintenance Enclosures, Billeting and Decontamination Shelters

## LED STRING LIGHT

**Long Life, Low Power Consumption Lighting  
Will Not Compromise Peripheral Electronics**

## LED Stringable Shelter Lights With EMI Protection

### Will Not Compromise Peripheral Electronics

EMI (electromagnetic interference) hardened lights will not compromise peripheral electronics, communication equipment, computers or medical equipment.

- Black out mode greatly reduces visible signature.
- Will not trip GFCI when connecting over 30 lights, exceeding military specification of 12-light connectivity.
- Light output and dispersion comparable to fluorescent lighting with significantly less energy consumption.
- Push-button dimming saves more power.
- Interoperable with Jameson's fluorescent string lights.

**Compliant with MIL-STD-461, RE102 and CE102  
for Army Ground**

Field Hospitals, Command Centers,  
Force Provider, BEAR Base

### The Green Solution

58-60% lower power consumption than fluorescent and  
50,000 hour rating

Jameson's LED lights offer more light with less energy  
consumption.
